 - Offloads bottleneck of index maintenance

Xinet 17.6 Enhanced Asset Accessibility

- Xinet Pilot for Windows
- Facetted Search interface
- HTML5/CSS3/Bootstrap
- Drag and Drop to Desktop (Mac and Windows)

Xinet 17.6 Extensible Archiving

- Archive aware API
- Technology partnership with Inpress
- Inpress **OnFile** connects Xinet with Archiware P5
- OnFile allows archiving and restoring from Xinet interface

Xinet 17.6 Search Tool selection

- Do you require custom pre-filtering, based on business-rules?
 - Is field specific searching a requirement?
 - Are you using third party interface plugins?
- Stay with current Xinet searchengine

Xinet 17.6 Search Tool selection

- Are quick and simple searching all you and your users require?
- Is the system bottlenecked by extremely large amounts of data?
Use new Solr search technology
- Do search facets give you all the refinement of results your users demand?
